

Ajit Kumar Pandit — Full Stack Developer

— MERN, Next.js & AI Integration

M 6200281082 • E ajit.workid@gmail.com • W ajitkumarpandit.nakprc.com

Professional Summary

Full Stack Developer specializing in MERN and Next.js with strong ability in developing production-ready applications. Skilled in API development and scalable UI development. Proficient in integrating AI capabilities into full stack systems — including LLM-powered features, AI API integration (OpenAI, Gemini, etc.), and leveraging prompt engineering to accelerate development workflows and build intelligent, automated user experiences. Actively exploring and implementing AI-driven automation across the full stack.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, SCSS, TailwindCSS
- **Backend:** Node.js, Express.js, Appwrite
- **Database & Security:** MongoDB, JWT, Bcrypt
- **AI & Prompt Engineering:** OpenAI API, Gemini API, LLM Integration, Prompt Engineering, AI-powered Feature Development, Retrieval-Augmented Generation (RAG)
- **Deployments & Tools:** Git, GitHub, Vercel, Netlify, Render, Cloudflare, cPanel

Projects

MERN Stack, Supabase, Minio, OpenAI API

AdvocateHub — Legal Services Platform (Under Development)

Live: advocatehub.org

- Built a secure legal consultation system with JWT authentication and advocate–client profile management.
- Implemented appointment booking with automated email confirmations using Nodemailer.
- Integrated AI-assisted legal document summarization using OpenAI API with custom prompt engineering for intelligent brief analysis and case insights.

Next.js, Appwrite, TailwindCSS, Gemini API

MAASI — Patient Attendant Booking Platform

Live: maasi.nakprc.com

- Developed a healthcare platform enabling users to book professional attendants.
- Implemented Appwrite-based authentication, database operations, and booking workflows.
- Designed a responsive, mobile-first interface with TailwindCSS.
- Integrated an AI-powered assistant using Gemini API with engineered prompts to guide users through attendant selection and care requirements.

MERN Stack, Payment Gateway, OTP Login, AI Integration

HyLearn — Online Learning Platform

Live: hylearn.vercel.app

- Built an e-learning portal with Razorpay/Stripe payments and OTP-based authentication.
- Created admin dashboards for course control, user management, and transactions.
- Leveraged prompt engineering and LLM APIs to auto-generate course summaries, quizzes, and personalized learning recommendations for students.

Next.js, TailwindCSS, LM Studio, Ollama, Gemini API

Hello Linux — Command Reference Web App for Engineers

Live: hellolinux.nakprc.com

- Built a productivity web app for system and network engineers that serves as a smart command reference, eliminating the need to memorize OS-level commands.
- Enables engineers to instantly look up, organize, and reuse commands across operating systems, reducing manual effort and human error.
- Designed an intuitive, fast-access interface tailored for real-world engineering workflows and daily terminal usage.

Education

Arka Jain University

Master of Technology in Computer Science

CGPA: 9.22

2024 – 2026

Chandigarh University

Bachelor of Engineering in Computer Science

CGPA: 7.49

2020 – 2023

NTTF

Diploma in Computer Science Engineering

CGPA: 8.08

2017 – 2020

Certifications

Cuvette

Full Stack Web Developer Certification

Oct 2023 – Apr 2024

Hands-on MERN stack training with real-world project development.
